

## TAR NC

### **Art. 30 (1)(b)(iv,v) – Information on the transmission services revenue including capacity-commodity split, entry-exit split and intra-system/cross-system split.**

In line with the Article 30 (1)(b)(iv) and (v) of the TAR NC, subject to Early Compliance Requirements, the following information should be published, if they are relevant for the current tariff period of the respective transmission system operator:

- „(iv) *the transmission services revenue;*
- (v) *the following ratios for the revenue referred to in point (iv):*
  - (1) *capacity-commodity split, meaning the breakdown between the revenue from capacity-based transmission tariffs and the revenue from commodity-based transmission tariffs;*
  - (2) *entry-exit split, meaning the breakdown between the revenue from capacity-based transmission tariffs at all entry points and the revenue from capacity-based transmission tariffs at all exit points;*
  - (3) *intra-system/cross-system split, meaning the breakdown between the revenue from intra-system network use at both entry points and exit points and the revenue from cross-system network use at both entry points and exit points calculated as set out in Article 5.*

Since the transmission system operator Eustream, based on the Decree of the Regulatory Office for Network Industries No. 223/2016 Col., which sets price regulation in gas industry, uses the tariff setting methodology based on the direct comparison of the prices with the other relevant TSOs from the Member States, neither allowed, nor target revenue are defined for the current tariff period. In this respect, taking into account the definition from the Article 3 of the TAR NC:

*“transmission services revenue’ means the part of the allowed or target revenue which is recovered by transmission tariffs”*

Transmission service revenue is also not defined for the current tariff period.
