D.	Fees	4
E.	Contact information	5

## A. Non-binding Demand indications

The involved TSOs, Eustream, Gas Connect Austria GmbH and TAG GmbH have not received any non-binding demand indications for firm capacity for natural gas at the interconnection points between both sides of the border between the Slovak entry-exit system and the Austrian entry-exit system (Market Area East) for any future period.

The following period has been included in this analysis:

a) non-binding demand indications received between 2025-07-07 and 2025-09-01.

Therefore, the amount of 0 for non-binding demand indications has been used as a basis for this demand assessment.

### B. Demand assessment

The received demand indications within the current incremental process between the Slovak entry-exit system and the Austrian entry-exit system (Market Area East) are zero. The historical usage of the concerned interconnection points as well as the potentially available capacity (i.e. technical capacity which is not yet booked in the long term) for the requested period are currently sufficient to cover potential future need for capacity. Capacity information in general can be found on ENTSOG's Transparency Platform.

# C. Conclusion for the non-initiation of an incremental capacity project/process

According to the assessment result of the non-binding demand indications under point B, no demand levels for incremental capacity need to be developed, and no incremental capacity project will be initiated. Based on the aforementioned decision, no technical studies for incremental capacity projects will be conducted.

### D. Fees

For the incremental capacity cycle addressed in this report, none of the involved TSOs introduced a fee for the evaluation and processing of non-binding demand indications.
